## *HIKE AND FLY DAVOS*

### **SNOWSHOE OR SKI TOUR WITH PARAGLIDING**

In order for the tour with paragliding to be carried out, the conditions must fit optimally. However, our mountain guides plan each tour so that we could descend normally if a start is not possible. The probability that a paragliding tour can take place is somewhat lower than for a normal mountain tour. But this also means that we will certainly be out in good weather. It is worth planning the date flexibly and reserving a time window of two to five days.

If you are a paraglider pilot yourself, it is possible that you fly down yourself. Our mountain guide will definitely help you to take off. It is your personal decision whether you want to start or not. Takeoff and flight is at your own risk. For pilots, the number of participants is not limited to 1 person.
